YUE SUN

yuesun9308@gmail.com

EDUCATION

University of Washington   Seattle, WA, US
Ph.D. in Electrical Engineering   2016.9 - 2022.3
Academics: Overall GPA 3.83/4
Thesis: *Nonconvex Optimization and Model Representation with Applications in Control Theory and Machine Learning*

Tsinghua University   Beijing, China
Bachelor of Engineering in Electronic Engineering   2012.8 - 2016.7
Academics: Overall GPA 89.2/100

WORKING EXPERIENCE

Microsoft, BingAds team, Software Engineer   Seattle, WA, US
Project: Advertisement Recommendation   2022.4 - present

- Prepocessed the data to count embedding coverage and prepare for downstream learning (**Scope(SQL)**, **Python**).
- Applied BERT for initial embedding of URL/user/Ads. Trained downstream CNN and TwinBERT models for predicting user-Ads and URL-Ads click-through rate (**Python/Pytorch** on GPU).
- Modeled commercial URL classification using semi-supervised learning, with demos in **Python/Pytorch**.
- Modeled URL-Ads recommendation (user-blind recommendation) by maximum apriori estimator and online learning, with demos in **Python/Pytorch**.
- Set up the flightings and maintained the inference pipeline of embedding generation and user to Ads ranking (**Java**, **Hadoop/Spark**, **Kafka**).

Nokia Bell Labs, Math & ALGO Bell Labs Summer Intern   Seattle, WA, US
Project: Audio Echo Cancellation with Sparse Coefficients   2021.6 - 2021.8
Host: Shirin Jalali

- Reframed audio echo cancellation problem as online least squares and implemented SGD, APA, IML, Catalyst.
- Combined with sparsity of the parameters, incorporated RIP of circulant matrix into algorithm analysis. Derived and implemented proportionate algorithms and regularized algorithms for sparse coefficient estimation.

Google, Software Engineering Intern (PhD)   Mountain view, CA, US
Project: Online Learning for Entropy Coding in Next-generation Video Codec   2019.6 - 2019.9
First authored paper in **DCC 2020**, *with a* **patent**. *Host: Jingning Han*

- Implemented online update algorithm for probability estimation for entropy coding.
- Generalized baseline algorithm by maximum apriori estimator with online optimization for adaptive learning.
- Implemented experiments on real dataset and the compressed file is 2% smaller than baseline (**C++ & Python**).

RESEARCH EXPERIENCE

Papers published in **NeurIPS, CDC, ICASSP, L4DC, DCC, ICML workshop, TSP, OJ-CSys**
Scholar page: https://scholar.google.com/citations?hl=en&user=IxBPfiYAAAAJ

University of Washington, Research Assistant   Seattle, WA, US
Project: Towards Understanding the Role of Representation Dimension in Meta-Learning   2020.9 - 2022.3
First/second authored paper accepted by **NeurIPS 2021, TOPML 2021, ICASSP 2021**, *Advisor: Maryam Fazel*

- Demonstrated the procedure and obtained statistical guarantee (sample complexity & error) of meta-learning.
- Obtained guarantee of meta-learning accuracy in the overparametrized regimes, theoretically proved the double descent phenomenon and verified it by numerical experiments.
- Generalized to non-linear models, e.g., multiple class classification, validated on image (CNN/Resnet) and text (LSTM/attention/transformer) classification with MAML as baseline (**Python/Pytorch**).

Project: Learning Linear Dynamical System via Regularization   2018.10 - 2022.3
First authored paper in **OJ-CSys, L4DC 2020 (oral)**, *Advisor: Maryam Fazel*

- Proposed Hankel nuclear norm (low rank) regularization that learns with provably fewer data and smaller error.
- Implemented regularized method on Daisy, Gym and Mujoco dynamical systems and observed the advantage in input sensitivity, simplicity of tuning parameters, training data size and estimation error (**Python/Pytorch**).

Project: Policy Gradient Descent in Control and Reinforcement Learning   2018.10 - 2022.3
First authored paper in **CDC 2022, CDC 2021**, *Advisor: Maryam Fazel*

- Proved the global convergence of non-convex policy optimization for a generic family of optimal control problems.

- Proposed the connection between policy optimization in RL and convexificon method in control theory.

Project: Perturbed Gradient Descent Method for Non-convex Optimization   2017.9 - 2017.12
First authored paper in **NeurIPS 2019, ICML workshop 2018**, *Advisor: Maryam Fazel*

- Derived convergence rate of noisy gradient descent method for nonsmooth nonconvex optimization problems and extended approximation strategy to Riemannian metric.

- Applied to image processing task where the retraction operator is trained by conditional GAN (**Python/Tensorflow**).

Ohio State University, Research Assistant   Columbus, OH, US
Project: Phase Retrieval and Low Rank Matrix Completion   2015.7 - 2015.9
First/second authored papers in **TSP, ICASSP 2016**, *Advisor: Yuejie Chi*

- Reproduced the derivation and conduced performance test for various phase retrieval algorithms.

- Derived an extension of Wirtinger Flow algorithms by expanding it from rank 1 case to low rank case. Analyzed the advantages with outliers.
